## vCIO Consulting with Strategic Roadmaps

 Technology is an investment.

 Business Goals should be forecasted.

## Cutting-edge technology solutions

Make sure all your computers are equipped with regularly updated antivirus software, firewalls, email filters, and antispyware

### Machine Learning AV

RFX deploys and monitors Intelligent Anti Virus to keep client's data safe and secure.

### WAYS OF VIEWING CLOUDS

**INFRASTRUCTURE AS A SERVICE (IaaS)**

- Allows users to purchase what they need based off consumption.
- The amount used can be altered based off varying needs throughout the year, such as increased infrastructure around the holiday season.
- These include AWS, Azure, etc.

**PLATFORM AS A SERVICE (PaaS)**

- With PaaS a third-party provider can manage virtualization, storage needs and the OS.
- An Example of this is a company called Apprendis.

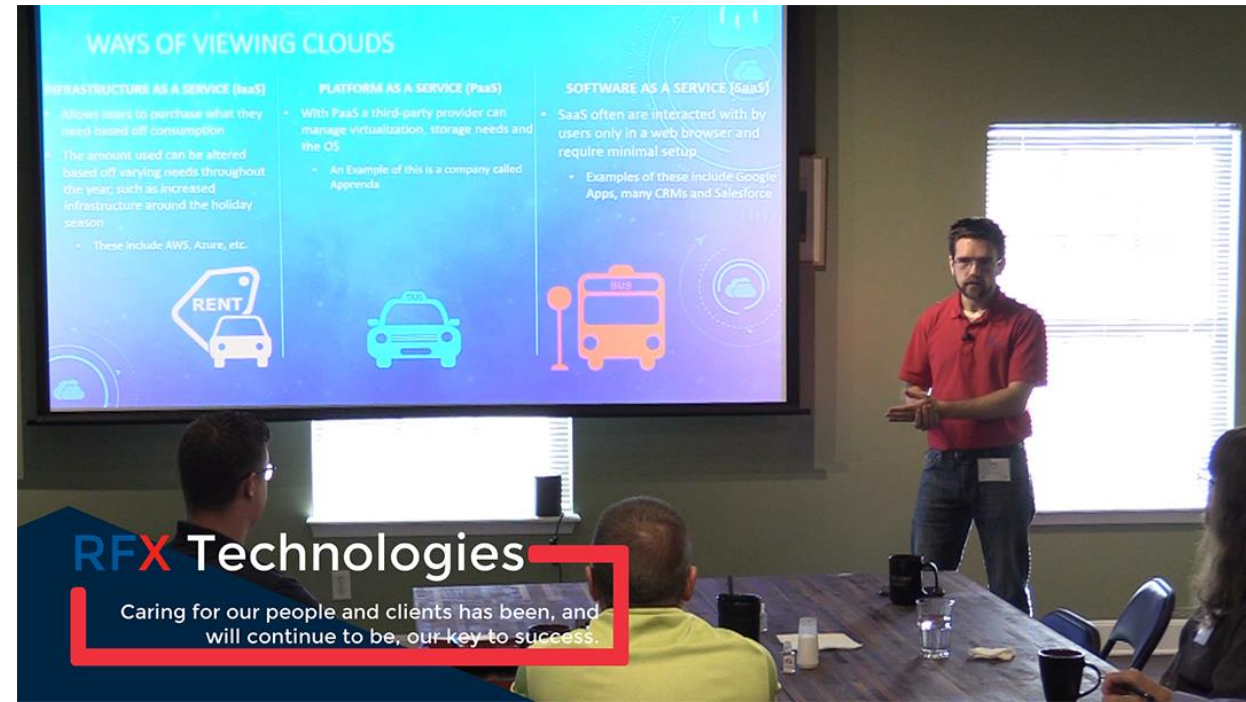

**SOFTWARE AS A SERVICE (SaaS)**

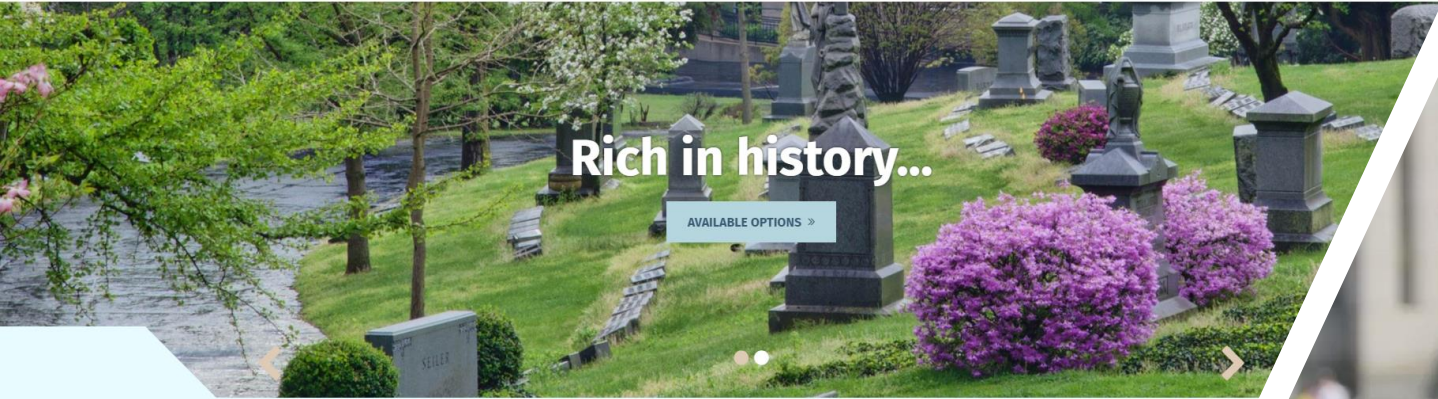

- SaaS often are interacted with by users only in a web browser and require minimal setup.
- Examples of these include Google Apps, many CRMs and Salesforce.

# HOW WE GOT HERE

- An RFX team member, Warrant Officer Brian Earley (pictured to the left) joined Honor Flight Bluegrass as a Guardian, for a mission flight in 2016 to see, firsthand, what a flight entails.
- We had **many** meetings to learn all we could about processes followed, and how flights are set up.
- We built the Honor App Program based on the original request and even MORE following our meetings and the mission we flew!!
- We tested the system against a real mission flight, gathering feedback from multiple individuals about how the system could be refined.
- We activated the system in May 2017, and have tweaked it to further refine how it helps Honor Flight organize, and manage data, and mission flights.
- First Mission ran Side by Side in September 2017
- We continue to enhance it even today!!
