

www.HonorApps.com

We are here to help you carry out your Hub’s Mission

Do not take our word for it, ask the Hubs who use the product how it can help you today! We have been part of 53 Missions in just a few short years. Looking forward to being part of many more to come!

To learn more, we went on our first HF mission in 2016. One of our Team members, Warrant Officer Brian Earley (left), flew as a Guardian. **After that we were hooked.**

Through a partnership with Honor Flight Bluegrass, we set off to build Honor Apps.

- * Something better than paper, spreadsheets, google documents, emails, and calendars.
- * Something that would be sustainable as Mission Leaders, Volunteers, and Board Members changed.
- * The best part – we have spent hundreds of hours enhancing the application since our first mission, based on feedback from the Hubs using the product.

Honor Apps can help –

- ◆ If you are flying across the country on a chartered flight or if you have assigned seats on a commercial flight.
- ◆ If you are taking buses all the way there or once you get there.
- ◆ If you need to coordinate staying in a hotel before you head out or for an overnight once you are there.
- ◆ If you want to use an online application on your website or continue to use paper and enter the data yourself.

We do not want to change how your hub supports our veterans. We want to support the way you run your missions with today’s technology.

18 Hubs and growing.

Check us out today - www.HonorApps.com/summit to find a time during the Summit to join one of our video conference calls. Meet us, learn more, and [win a prize for you or your Hub!!](#)

Thanks to our Hubs for your guidance, support and allowing us to be part of your Missions!!
